Cover Letter

Dear Recipient,

I will be moving to Barcelona soon and found the post for Front-End Engineer and thought it would be a good idea to apply. While you will be able to find out more about my developer experience in my CV, I would like to point at the main features I believe I can make a difference in this position:

01. I am a business-driven developer, meaning I always keep in mind our business model, in order to provide the best experience to our users and the most profitability and growth to our company. I have created two small companies from scratch and that has given me the opportunity to really understand the big picture in a tech company.

02. I have 8+ years' experience as a full stack developer, building real world solutions on education, data insights and LegalTech. In this journey I forced myself to always improve my technical and theoretical skills and also to keep in line with the latest technologies, frameworks, libraries and design patterns. I am also fluent in english.

03. I love to code, is my profession and my hobby. As an example of this, whenever I have some spare time, I like to build some small projects just for the fun of it. You can see my projects on felipeares.github.io

04. I am moving to Barcelona because I am looking to learn, work and thrive in a bigger tech scene (I have an EU Passport). I am looking forward to work for a company with a large user base, with focus on user experience/design and with the possibility to work with a team of good and motivated developers.

Sincerely,

Felipe Ares

Felipe Ares

Fluent English - Native Spanish
Chilean / Croatian (EU Passport)

Worked With

Front End
</> RxJS Javascript/Typescript </> Angular [2,4] </> ReactJS </> Ionic2 </> JQuery </> D3.js </> CSS3 </> Webpack

Back End
</> PHP MVC </> Express - NodeJS </> Flask - Python </> Serverless AWS Lambda - Python/nodeJS </> Firebase - Cloud Functions on nodeJS </> SQL - MySQL, PostgreSQL </> NoSQL - MongoDB, DynamoDB

Cloud Services
</> AWS - S3, EC2, Lambda, DynamoDB, CloudFrond, Route53, RDS, IAM </> Monolithic on Linux Server - GoDaddy, BlueHost, HostGator </> GCP - Firebase Hosting </> Docker

Developer Experience

Legalbot
2018 - 2019

Legalbot is a web app for the automation of contract revision and verification.
BackEnd: NodeJS, Python on Serverless Infrastructure - DynamoDB - S3
FrontEnd: Angular 4. The main complexity was to build a contract revision management system with the ability to search and highlight special paragraphs on a PDF text and display the results to the user in an easy to use and intuitive interface.

Datasalmon
2017 - 2018

Datasalmon (datasalmon.com) is a IOS/Android app with the Most UP-TO-DATE information available of the Chilean Salmon Industry.
BackEnd: PHP - MySQL
FrontEnd: Hybrid Mobile App with Ionic2 for payed users and JQuery/Ajax + Bootstrap for admin purpose.

TGA
2017

TGA is a propTech startup providing Business/Comercial solutions to the industry.
BackEnd: NodeJS (Express) - MongoDB
FrontEnd: Visualizations built on D3.js. The task was to build an interactive visualization displaying user`s interactions and evolution across the platform.

Humind
2012 - 2017

Humind is an online interactive video learning platform which today serves more than 3.000 users.
BackEnd: PHP - PostgreSQL
FrontEnd: It evolved with time from plain (HTML5 + Jquery/AJAX + CSS3) to an AngularJS + Bootstrap, to an Angular2. The main complexity was to build an interactive module capable of testing/questioning the users within the video player and keep track of progress online and offline.

Business & Consulting

Innspiral - Innovation Consulting Firm
2010

The Boston Consulting Group
2009

Hobby & Volunteer

Enseña Chile 2015-2016. Science school teacher (Chile's Teach for America)
Code Art Diploma - Universidad del Desarrollo 2013
